Abstract. This Qur'anic paradigm is very important for modern life because as you already know that the Qur'an for Muslims is primary guide and resource in all areas of life. Well, the Koran itself directs us to walk on the *shirathal mustaqiim* interpreted as a way straight God SWT so that Then We can endtask life in a manner husnul khatimah. So, we as humans are required to make the Qur'an the solution to all life's problems. Al-Qur'an for people Islam is source primary in all facet life. The Qur'an is a source of teachings on theology, law, tasawuf, thought, reform, education, morals and other aspects. No only that, the Qur'an is also a benchmark of right or wrong, good or bad, And beautiful or Bad. In the end, the Qur'anic paradigm is in line with the goals of Islamic education, namely worshiping Allah SWT (QS Al-Dzariyat: 56). In other words, the Qur'anic paradigm must

create Muslim individuals who believe and fear of Allah SWT who can lead people to achieve inner happiness the life of this world and the hereafter.

Keywords : Paradgim, Qur'anic, Islamic Education

INTRODUCTION

Modernization own connotation Which positive, that is achievement meaning And accept the principles modernity, that is, rationality, change progress technology and independence. But behind the modernity of today's world civilization, many seen the days gone by filled with quarrels, crime and the Such things often occur, along with the great threats that haunt modernity That Alone, in the form of secularization globalization, materialization, individualist And even decadencemorale is a threat bringas. All at once it can exploded all joints element life harmonious man. Of course just, There is problem which always always discussed muslim thinkers in the era 21st century, in order to know whether Islam and Muslims with the Qur'an in his grasp will participate in the progress of modernization?. What is the role and bid solution Al-Qur'an To use create order mark that life ideal? And still Lots Again question Which must answered in writing simple on this occasion. In other words, this paper wants to explain how man building a paradigm Quranic in life And modernization progress.

kindly etymological say paradigm originate from Language Greece Which origin he said was *para* And *digma* . *para* contain meaning beside, beside, and environmental conditions. *Digma* means point of view, example, and ideal. It can be said that a paradigm is a perspective or perspective way of thinking. As for in a manner paradigm terminology is way think in terms of that view comprehensive and conceptual a reality or a problem with using scientific theories standard and scientific method Which can be trusted. With thereby, Paradigm Quranic is the point of viewAnd way of thinking about something reality or a problem based on Al-Qur'an. Allah SWT says:

نَزَّلَ عَلَيْكَ الْكِتَابَ بِالْحَقِّ مُصَدِّقًا لِمَا بَيْنَ يَدَيْهِ وَأَنزَلَ التَّوْرَةَ.

"He lower Al Book (Al-Qur'an) to you actually; justify book Which has lowered previously And lowerTorah and the Gospel" (Letter Ali Imran/3:3).

Important For looked something through paradigm Quranic Because the Koran is A methodology science Which absolute the truth. No like methods science else that the truth relatively And tend as subjective moral standards. Al-Qur'an is a source of law that is absolutely true and Al-Qur'an The Qur'an is an objective moral reference. This is in accordance with the words of the Prophet Muhammad "I leave two case which you guys No will get lost forever If you hold on firm to both of them: *book of Allah wasunnati* . Neither will separate until meet in my lake." (HR

Hakim, shahih). So with see allmatter through paradigm Quran, Inshaallah all problems will be resolved, there is blessing inside it, And will going to to safety.

The existence of awareness for all Muslims is the most important for maintaining and realizing this Qur'anic paradigm. Because, without the awareness of the people these Muslims, the paradigm will not materialized And maybe it could happen chaos for all Muslims Because of course only Al-Qur'an guidelines for whole Islamic Ummah .

RESULTS AND DISCUSSION

Al-Qur'an for people Islam is source primary in all facet life. Al-Qur'an is source teachings theology, law, tasawwuf, thought, renewal , education, morals And aspect aspect other. Gauge measuring Correct wrong, good and bad, and beautiful and ugly is the Qur'an. If looking for other sources in determine right or wrong Good bad, and beautiful ugly, then somebody considered No consistent in Islam, one hypocritical attitude deep view of the Koran including disrespect.

In this context, the Qur'anic paradigm discussed in this paper can be understood as a perspective or way of thinking about an issue based on the Qur'an, which is the main guideline for Muslims. It is very possible that the content of the verses of the Qur'an can be used as a basis for thinking. The wealth of human scientific disciplines will surely continue to increase if research and scientific research are developed on a dynamic foundation, namely the Qur'an. The Qur'anic paradigm will build a framework for the development of branches of knowledge knowledge from observable results that can be recognized.

In Islam there are three signs of power or verses or God's law that are highly emphasized to be explored in depth, namely: (1) God's verses contained in His word or commonly called qauliyyah verses; (2) God's verses spread out in the universe or commonly known as kauniyyah verses; and (3) the verses of God that are found in humans or also known as insaniyyah verses. All three though visible as if they were separate, but in principle they are the same and complement each other, because they come from the same source. The modern (Western) scientific paradigm is currently dominant, because it is only centered on the study of nature and humans partially, and ignoring the existence of God's revelations, so that they experience an impasse in solving various problems of modernity, and even contribute to making a major contribution to the birth of the process of modern human dehumanization.

What was the purpose of the Qur'an being revealed? Yusuf Al-Qaradawi explain that lowered goal Al-Qur'an most No There is seven type, i.e. straighten creed man, confirm glory man And rights basic man, steer man For worship in a manner Good and right to God SWT, invite human for purify spiritual, constructive House ladder Which sakinah and put position dear for women, building the people become witness on humanity invites human agar each other help.

For dig source historical, philosophical, psychological, sociological, And pedagogical about the Quranic paradigm that brings progress and modernity to past, we can learn ways For reach progress on the golden age of Islam and study the role of the Koran in realizing progress in that era. In the history of Islamic civilization there was a period called the golden age Islam. It is called the golden age of Islam because Muslims are at their peak progress in various aspect his life: ideology, political, social culture, economy, science and technology, military and security. Because of that progress also, then the Islamic world became the center of civilization, and the Islamic world became a super-power within economy And political.

The expansion of Islamic da'wah is increasingly widespread and accepted by all parts of the world world when Islam came. Political power is increasingly widespread, which has implications economic prosperity is also more open and of course more equitable. If we examine in depth the factors that caused Muslims to advance on then and in a very long time, then the answer is certain only because Muslims make the Al-Quran as a paradigm of life. Al-Qur'an at that time it was not only used as a source of teachings but also became paradigm in the development of science and knowledge, development culture, even Al-Qur'an presented to overcome and deal with various problems in the life of Muslims today That. In the golden age of Islam, the Koran was used as an internal paradigm all aspects of life and Rasulullah saw. become a role model in implementing Al-Qur'an in life a day day.

The Prophet in his words, "The best generation is my past generation next generation And generation next" (HR Muslim). Attitude commitment para friend and generations next make Messenger of Allah as example in all aspects of life and actually their behavior is in accordance with the guidance of the Koran itself. Allah said, "Whatever the Messenger of Allah brought to you, then take it and what the Prophet forbade it, then leave it" (QS Al-Hashr/59: 7).

The prospect of the Qur'anic paradigm in giving birth to relevant Islamic sciences the reality and needs of Muslims are very large, this is because this paradigm is based to the reading of the Al-Qur'an has a direct connection with the applicative side and makes the Al-Qur'an more functional for the life of a Muslim, especially in the aspect of his personality.

Al-Quran as a scientific paradigm is the basis and foothold in the scientific tradition. Therefore, it is needed understanding of the Koran both in the form of understanding the meaning and also meaning or wisdom in it. And to understand meaning, then we have to improve the pattern of learning the Koran which is now only focused on tajwid and recitations of the Koran. So that in reading and studying the Koran, we must read and learn the meaning too. By reading the meaning, then slow eventually we will be able to understand its meaning. The Koran has hijab, where the hijab will become a wall for the disbelievers, however for Muslims, the

hijab will also exist, if we don't learn and understand the meaning and intent of the Koran.

Paradigm of the Koran means a construction of knowledge. The construction of knowledge was originally built with a purpose so that we have the "wisdom" to form behavior that is in line with the Islamic system, including its scientific system. So, besides providing an axiological picture, the paradigm of the Qur'an can also serve to provide epistemological insight.

In the end, the Qur'anic paradigm is in line with the goals of Islamic education, namely worshipping Allah SWT (QS Al-Dzariyat: 56). In other words, the Qur'anic paradigm must create Muslim individuals who believe and fear Allah SWT who can lead people to achieve happiness in life. the life of this world and the hereafter. Islamic education is oriented towards the creation of scientists (ulama) who are afraid and amazed at the greatness of Allah SWT (QS Fathir: 28), and is oriented towards intellectual creation with qualifications as Ulul Albab that can develop quality of thought and quality of dhikr (imtaq and science and technology) at the same time (QS Ali Imran: 191-193).

CONCLUSION

This Qur'anic paradigm is very important for modern life because as you already know that the Qur'an for Muslims is primary guide and resource in all areas of life. Well, the Koran itself directs us to walk on the *shirathal mustaqim* interpreted as "Road straight God SWT" so that Then We can endtask life in a manner husnul khatimah. So, we as human beings are required to make the Al-Qur'an as place counseling, Then make it as torch life. you know No,Why? Because the Qur'an can be a source of teachings about theology, law, tasawuf, thought, reform, education, morals and other aspects. No only that, the Qur'an is also a benchmark of right or wrong, good or bad, And beautiful or Bad.
